

THE BEST SCHOOL

DIGITAL TRANSFORMATION

Digital Transformation with AI

Learn to connect strategy, operating model, governance, change, data, AI readiness, and program delivery in one credible transformation approach.

16 weeks full-time | 24 weeks part-time

Remote | Teaching in English | Up to 10 learners

A practical path from context to evidence

A transformation changes capabilities, decisions, processes, technology, and behavior across an organization. This course moves beyond a single project and teaches how to shape a portfolio, govern investment, build readiness, and realize benefits.

WHAT YOU WILL BE ABLE TO DO

- 01 Assess transformation pressure, organizational maturity, and change readiness.
- 02 Shape a portfolio of opportunities and investment cases under uncertainty.
- 03 Design operating-model choices, governance, and clear decision rights.
- 04 Evaluate data and AI readiness with responsible adoption controls.
- 05 Build capability, sponsorship, communication, and feedback into the change.
- 06 Redesign processes and governed human-in-the-loop workflows.
- 07 Coordinate workstreams, benefits, and an executive transformation narrative.

LEARNING MODEL

Live instruction, guided workshops, individual practice, team simulations, invited practitioners, and one continuous capstone.

01

Transformation Context and Change Readiness

FT weeks 1-2 | PT weeks 1-3

Analyze why change is needed, how ready the organization is, and where transformation pressure originates.

- Digital and AI transformation patterns
- External drivers and internal constraints
- Capability and maturity assessment
- Stakeholder landscape and guardrails

PRACTICAL OUTPUT

Transformation context brief and readiness assessment.

02

Opportunity Portfolio and Business Cases

FT weeks 3-4 | PT weeks 4-6

Identify, compare, and sequence opportunities by value, feasibility, risk, and strategic fit.

- Opportunity discovery and value streams
- Use-case assessment and portfolios
- Benefits, costs, and investment logic
- Pilots, experiments, and funding stages

PRACTICAL OUTPUT

Prioritized transformation portfolio and investment case.

03

Operating Model, Governance and Decision Rights

FT weeks 5-6 | PT weeks 7-9

Design the connection between strategy, delivery, risk, and operational ownership.

- Operating-model choices
- Governance forums and decision rights
- Portfolio, program, and product interfaces
- Vendor and partner governance

PRACTICAL OUTPUT

Target operating model, governance map, and decision-rights matrix.

04

Data, AI Readiness and Responsible Adoption

FT weeks 7-8 | PT weeks 10-12

Create data, risk, and responsible-use foundations for credible AI transformation.

- Data quality, access, and ownership
- AI use-case lifecycle and evaluation
- Privacy, security, and regulation
- Human oversight and automation boundaries

PRACTICAL OUTPUT

AI readiness assessment, control map, and adoption standard.

05

Change Leadership and Capability Building

FT weeks 9-10 | PT weeks 13-15

Prepare leaders, teams, and affected people for new decisions, processes, and responsibilities.

- Change narratives and sponsor alignment
- Participation, resistance, and feedback
- Capability academies and role transitions
- Psychological safety and experiments

PRACTICAL OUTPUT

Change strategy, capability plan, and sponsor narrative.

06

Process, Platform and Workflow Transformation

FT weeks 11-12 | PT weeks 16-18

Redesign work across process, platforms, and automation with measurable operational outcomes.

- Process discovery and service blueprints
- Platform and integration choices
- Human-in-the-loop workflows
- Operational metrics and controls

PRACTICAL OUTPUT

Future-state service blueprint and governed automation prototype.

07

Program Delivery, Scaling and Benefits

FT weeks 13-14 | PT weeks 19-21

Coordinate a transformation portfolio across workstreams, dependencies, releases, and benefit owners.

- Program roadmaps and increments
- Cross-team dependencies
- Risk, assurance, and reporting
- Benefits realization and course correction

PRACTICAL OUTPUT

Integrated roadmap, benefits register, and executive dashboard.

08

Enterprise Capstone and Executive Narrative

FT weeks 15-16 | PT weeks 22-24

Connect strategy, governance, delivery, and change in a defensible transformation proposal.

- Enterprise transformation case
- Executive decision preparation
- Board-level risk and investment story
- Implementation sequence and first 100 days

PRACTICAL OUTPUT

Enterprise strategy, executive presentation, and first-100-days plan.

One connected case, built across the course

Shape an enterprise AI-enabled service transformation. Create the readiness assessment, portfolio, business case, operating model, AI control map, change strategy, service blueprint, roadmap, benefits register, and first-100-days plan.

PORTFOLIO EVIDENCE

- 01 Transformation context brief and readiness assessment.
- 02 Prioritized transformation portfolio and investment case.
- 03 Target operating model, governance map, and decision-rights matrix.
- 04 AI readiness assessment, control map, and adoption standard.
- 05 Change strategy, capability plan, and sponsor narrative.
- 06 Future-state service blueprint and governed automation prototype.
- 07 Integrated roadmap, benefits register, and executive dashboard.
- 08 Enterprise strategy, executive presentation, and first-100-days plan.

CAREER DIRECTIONS

Digital Transformation Manager

Transformation Office Analyst

Change and Adoption Lead

Business Transformation Consultant

AI Transformation Program Lead

Choose a learning rhythm

The content and capstone are shared across both tracks. Only pacing and weekly learning rhythm differ. All dates are provisional.

8 Feb 2027 - Full-time - 16 weeks

Remote | English | Up to 10 learners

8 Mar 2027 - Part-time - 24 weeks

Remote | English | Up to 10 learners

3 May 2027 - Full-time - 16 weeks

Remote | English | Up to 10 learners

IMPORTANT NOTES

- Exact live-session times are confirmed before each cohort.
- AI tools are used as assistants. Evidence, privacy, security, and human accountability remain part of every decision.
- The Best School certificate confirms completion of this curriculum and its practical requirements. It is not an external professional credential.
- Course content may be updated to reflect changing practice while the published learning outcomes remain stable.
